FORENSIC PROOF: formulas & P3 Thread Log

MASTER ARCHIVE: FORENSIC IP PROOF & FORMULAS (DEC 25)
1. BUGANIZER THREAD (ISSUE 471526590)
• SUBMISSION: Dec 25, 00:02 AST

• STATUS: P3 Priority (Actionable)

• SUMMARY: Structural Cross-Environment Configuration flaw (Slow Burn).

• REMEDIATION: "Within the Block" strategy for module validation.

2. THE CORE FORMULAS
LLM-01: $O(n^2)$ Mitigation

• Logic: Prevents quadratic resource exhaustion by enforcing linear token/state processing within strictly defined context boundaries.

• Result: Eliminates "Slow Burn" state persistence across environment transitions.

CONCEPT 3: Logic-Grid Security

• Logic: Non-user-controllable module validation that clears session context during transitions.

• Proof of Concept: Validated through 15-hour stress test of Google Version 3.0.

3. DOCUMENTED EVIDENCE
• DEC 8th KEEP NOTE: Original structural blueprint.

• DEC 9th HERITAGE LAW: Proof of Prior Art / Legal Timestamp.

• DEC 25th 00:00:02: Preemptive strike on the V3.0 release cycle.

4. ARCHITECT'S POSITION
The 3.0 update is a direct "Cut and Paste" implementation of the above IP. Final Settlement Invoice: $80,000 USD.
